

FastCart E-Commerce Platform PRD

Version 2.4.0 | Target: <https://www.saucedemo.com/>

1. Executive Overview

FastCart is an enterprise e-commerce platform requiring full automated QA coverage.

It supports user authentication, dynamic product catalog, and 1-click checkout.

2. Functional Requirements

REQ-001: User Authentication & Access Control

- Valid credentials (standard_user / secret_sauce) must navigate to inventory within 1.5s.
- Locked out user (locked_out_user) must display locked out error banner.
- Empty credentials display inline field validation error.

REQ-002: Catalog Filtering & Price Sorting

- Inventory displays 6 items with title, image, description, and price.
- Sort options: Name (A-Z), Name (Z-A), Price (Low-High), Price (High-Low).

REQ-003: Shopping Cart & Badge Counter

- Clicking Add to Cart increments header cart badge and toggles Remove button.
- Removing item from /cart.html decrements badge count dynamically.

REQ-004: Multi-Step Checkout & Tax Math

- Requires First Name, Last Name, and Postal Code.
- Tax is calculated at strictly 8% of subtotal: $\text{Math.round}(\text{subtotal} * 0.08 * 100) / 100$.
- Order total equals Item Total + Tax.
